

## How can I stop lines 2-6 from being renewed in Batch Rental program?

Monday, 19 October 2009 10:05 -

---

say you have a 1500 form with 3 items  
top line is wheelchair  
2nd and 3rd line rented accessories

the batch program looks at the dates of service and rental status of the first item. if it's marked RET the whole form stops renting.

If the 2nd/3rd item changed to FILE RET NA (CLAIMSTATUS) THEY WILL be renewed on the form but the status will be NA and thus not print or go to reconcile module.

if you want the bottom two items to stop being updated change them to rent/SALE status of SALE

rent status of NA or RET

claim status of NA OR ANYTHING BUT FILE

and they will be removed during the next billing cycle .
