

How quickly can I get the software and get it running!

Monday, 19 October 2009 10:40 -

We do electronic installation of the software for you. This means once your credit card payment has been approved (or Paypal) we schedule a time/date to install your system.

With your permission, you grant us access into your computer using a remote control tool that we supply. No installation needed.

We then upload the software, install it, configure it and test it to make sure your start up experience will be positive
